

The PAC 22 series 3 is the most capable mobile air conditioning unit and one of our larger and more powerful stylish water cooled 'Split' portable air conditioners. Essentially strong, compact and easy to install. The PAC 22 is made up of three components. The room unit contains a refrigeration circuit with water cooled condenser. The external unit is a simple water to air exchanger. These two components are connected by a length of flexible line containing flow and return cooling water pumped from the room unit to the heater exchanger. With the PAC 22 the smaller condenser unit can be placed up to 30 meters from the room unit.

Specifications	
Nominal cooling duty	6.5 kW
Air Flow (max)	1,590m ³ /hr
Typical cooled area	156m ³
Power supply	230 V 13amp
Indoor noise level (max)	59 dBA @ 3meters
Outdoor noise level (max)	62 dBA @ 3 meters
Indoor weight	122 kg
Outdoor weight	20 kg
Indoor dimensions (L x W x H)	390 x 810 x 1282
Outdoor dimensions (L x W x H)	280 x 560 x 520
PAC line length	5 meters
Control	Automatic thermostat
Average power consumption	2,376 kW/hr
* capable of operating down to 10°C
